Brock's Gap Training Center is an organization dedicated to firearm education and training as well as the promotion and advancement of all shooting sports.

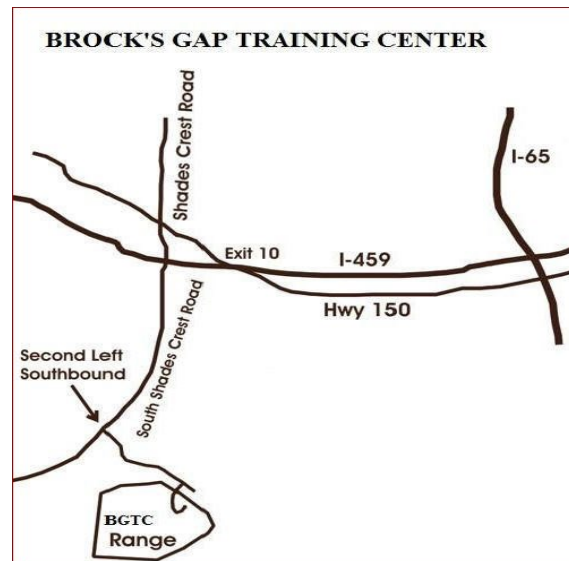

The organization was established in 1962, and since that time has focused on providing the community with a safe place to learn and hone safe firearm handling skills and to enjoy firearm-related recreational and competitive events.

Brock's Gap Training Center has a knowledgeable training staff ready to help you meet your firearms training goals. Classes are available for topics ranging from beginner-level to advanced skills training.

We also have private lessons, small groups, and women-only classes, along with non-shooting seminars and clinics designed for personal protection, situational awareness, and first aid.
